MOP / metal

Bone-inlay & marble chest of drawers

wood / MDF / bone inlay / marble

Bone-inlay storage chest

wood / bone inlay

Sculptural pedestal accent piece

metal / accent

Commercial model

One clear commercial point, with flexibility where direct workshop engagement is preferred.

Option A - transact with Bhagyashree Enterprises

PREFERRED

The buyer receives a consolidated Bhagyashree quotation and transacts with Bhagyashree Enterprises. We coordinate the selected workshop(s), development, finish communication, sampling follow-up and production communication.

Margin structure: Bhagyashree quotes a final product price inclusive of its sourcing / coordination margin. The margin is therefore built into the quoted selling price, not added later as an extra charge.

Option B - direct workshop transaction where appropriate

If the buyer prefers to transact directly with a particular underlying workshop, this can be considered category by category. In that structure, Bhagyashree charges a separately agreed sourcing / coordination fee for the defined scope.

Fee / percentage is agreed before sample development or production based on category, volume and coordination requirement; no universal percentage is being represented at this introductory stage.

Why the coordinator model can help

- One point for multi-workshop communication
- Maker matched to design, material and target price
- Centralized sample / finish follow-up
- Ability to combine more than one Jodhpur category

Custom finish, MOQ & lead time

Product-specific confirmation after the buyer shortlists pieces or directions to develop.

Category	Custom finish capability	MOQ approach
Wood / cane seating	Wood stain / polish, cane tone and upholstery direction can be developed against approved reference	MOQ confirmed by frame / upholstery specification; sample development can be explored
Solid / mango wood tables	Stain, paint, polish and selected surface treatments subject to sample approval	MOQ confirmed per design and workshop
Wood + metal / brass	Metal finish, powder coat / patina and wood finish can be coordinated together	MOQ confirmed per construction; low-volume development considered where feasible
Inlay / MOP accents	Pattern, colour and surface treatment can be explored within specialist workshop capability	MOQ confirmed per piece; sampling considered before production
Small accent / pedestal pieces	Finish and colour variants can be explored category-wise	MOQ depends on process, packing and workshop efficiency

INDICATIVE PRODUCTION LEAD TIME

30-45 days after final specification / sample approval

Transit time and product exceptions confirmed separately.

Current supply references

Transparent commercial representation for buyer review.

Direct Bhagyashree retail references

Bhagyashree Enterprises is currently building its direct furniture and home-decor retail supply portfolio. At this stage, we are not presenting prospective conversations, workshop customers or manufacturers' historical buyers as direct Bhagyashree clients.

This keeps the representation accurate. Where appropriate during deeper due diligence, workshop capability history or category-specific references can be discussed with the relevant workshop, subject to availability and permission.

THE PROPOSED VALUE

A practical Jodhpur sourcing desk: identify the right workshop for each selected piece, develop the required finish and specification, and keep communication centralized through Bhagyashree rather than presenting unrelated workshops as one factory.

Suggested next step

The buyer can shortlist 3-5 pieces from this edit. We will then return product-wise feasibility, finish direction, MOQ, indicative commercial quote and sampling requirement before a call.

Ready for curation review

Please shortlist the products or material directions that feel most relevant. We can then convert the visual edit into a product-wise commercial development sheet.
